ergoCentric® Footring

ergoCentric®

The ergoCentric Footring; reduce workplace fatigue.

Footrings support the user's legs for various height requirements so that problems including fatigue, poor posture and decreased circulation can be avoided. The ergoCentric Footring can be easily adjusted without a tightening knob. Simply turn the footring counter-clockwise to loosen, move the footring to the desired location and turn it clockwise to tighten.

Features

- 20″ outside diameter
- ¾″ diameter chrome ring riveted to frame
- 4 spoke aluminum frame
- 50mm hub with nylon insert
- Height adjustable by manually turning the footring – no tightening knob required
- Please check individual chair specifications for availability of the footring option.

Warranty

10 Years
