Arm supports help stabilize the upper body, thereby reducing the negative effects of static muscle activity and assist in getting in and out of the chair. Arm supports that adjust in and out as well as up and down help ensure the weight of your arms is comfortably supported and reduce stress on your neck and shoulders.

**For more information on our available arms, please contact customer service.**

At ergoCentric, we believe that the preservation of the environment is one of the most important issues facing the furniture industry today.

As a producer of high-quality ergonomically-correct seating systems, ergoCentric's commitment to environmental protection is a natural outgrowth of our concerns for workplace health and safety. Accordingly, environmental initiatives are an integral part of our corporate culture.

ergoCentric management systems are designed to ensure the integration of all applicable governmental as well as internal environmental, health and safety requirements into our business processes. As a result we have earned the ISO 14001 international standard for environmental management systems.

In cooperation with our suppliers, customers and employees, we continually strive to achieve industry leadership by including refurbishing and recycling as formal design considerations and as a part of our business model.

Our build-to-order business model increases efficiency and eliminates waste by ensuring that each seating system produced has a buyer and that it is the right long term solution for that buyer.

The modular designs of ergoCentric chairs allow parts to be easily interchanged to meet user requirements long into the future, ensuring less waste goes to landfill sites. As well, water-based glues are used in upholstery processes protecting the environment and employees from harmful emissions.

As new technologies evolve, so will the way we do things. Environmental concerns will continue to influence what we do and how we do it.

## Customers Own Material (C.O.M.) Fabric Instructions

### C.O.M. Customers

ergoCentric offers 2 alternatives for C.O.M. orders: **Hassle Free C.O.M./Traditional C.O.M.**

**Traditional C.O.M.:** Please provide us with the required information listed below and we will confirm if there is the need for testing. Approved C.O.M. and samples for testing, if required, must be sent to the address on this price list in accordance with the C.O.M. terms as described on page 1. Please contact Customer Service for special shipping instructions.

For both Hassle Free and Traditional C.O.M. orders, we require the following information with your purchase order to provide accurate customer service and order fulfillment:
