

# airCentric™ 2

Be cool. Be comfortable.  
Be productive.

ergoCentric®

# Airflow technology that works harder for you.

Inspired by the breathability of mesh task chairs, the airCentric™ 2 combines the airflow inherent in mesh seating with the proven ergonomics of ergoCentric's foam and fabric seating for a truly comfortable seating experience.

With 66 honeycomb cells, the back foam is designed for ventilation. Vents in the back cap allow continuous airflow through the entire back structure.

## Airflow fabric

Maximize the airCentric's airflow capabilities by choosing Air Knit fabric. This durable, three-dimensional fabric provides optimal breathability while its cushioned softness offers long lasting comfort.

# Upgraded comfort

The airCentric™ 2 combines innovative airflow engineering, 30 years of proven ergonomic design, patented technologies and new materials to keep you cool and comfortable.

## **Airflow innovation**

The airCentric 2 offers a new, softer, molded back foam cushion. Though softer, it is highly durable and stands up to the test of years of continuous use without losing load-bearing capabilities, shape or dimensions. The molded foam provides long lasting lateral and lumbar support while allowing air to flow through the honeycomb rib design of the internal back structure.

## **Upgraded appearance**

The airCentric 2 has the same number of air holes as the original; however, the addition of a layer of breathable material renders the holes invisible, improving the aesthetic of the airCentric without compromising air flow. The airCentric 2S, with a solid back cap, is also available and desirable in areas that have stringent cleaning requirements.

## **Arm options**

Designed from top to bottom by ergoCentric, the tCentric armrest provides unparalleled support. The patent-pending tCentric armrest is silent, smooth gliding and available with 3 levels of adjustability—vertical, lateral and patented 360° swivel—ensuring the ability to maintain a neutral typing, texting or reading position. The tCentric armrest dramatically reduces stress on the shoulders and neck.

airCentric™ 2

airCentric 2S  
Ideal for healthcare environments

## The widest range of adjustment options for customized support.

- Air lumbar support with new and improved comfort
- Superior arm options with combinations of swivel, lateral and height adjustments
- Proprietary 5" of infinite back height adjustment
- Geometrically shaped paddles
- Patented adjustable headrest with three pivot points and 7" vertical and horizontal adjustments
- Multiple seat sizes

airCentric™ 2S solid back cap

tCentric armrest

Optional adjustable headrest

## airCentric™ stacker

The airCentric stacker chair provides a modern aesthetic with a unique airflow backrest complementing the design of the airCentric 2 ergonomic task chair. Perfect for training rooms, conference rooms, guest chairs and more.
